**Office Action (Official Letter) About Applicant's Trademark Application**

**U.S. Application Serial No.** 90894753

**Mark:** M MONSTER

**Correspondence Address:**

Matthew Powelson  
321 LAW, INC.  
P.O. BOX 911  
MONTEREY CA 93942 UNITED STATES

**Applicant:** Monster, Inc.

**Reference/Docket No.** MON.T.1738

**Correspondence Email Address:** [matt@321-law.com](mailto:matt@321-law.com)

## FINAL OFFICE ACTION

**Response deadline.** File a request for reconsideration of this final Office action and/or a timely appeal to the Trademark Trial and Appeal Board (TTAB) within three months of the “Issue date” below to avoid [abandonment](#) of the application. Review the Office action and respond using one of the links below to the appropriate electronic forms in the “How to respond” section below.

**Request an extension.** For a fee, applicant may [request one three-month extension](#) of the response deadline prior to filing a response and/or an appeal. The request must be filed within three months of the “Issue date” below. If the extension request is granted, the USPTO must receive applicant's response and/or appeal within six months of the “Issue date” to avoid abandonment of the application.

**Issue date:** April 11, 2023

### INTRODUCTION

On July 8, 2022, action on this application was suspended pending disposition of cited U.S. Registration No. 4106625, for which maintenance documents were due to be filed. *See* 37 C.F.R. §2.67; TMEP §716.02(e). USPTO records indicate that the cited registration remains valid. Accordingly, examination is herein resumed.

In a previous Office action dated December 21, 2021, the trademark examining attorney refused registration of the applied-for mark based on the following: Section 2(d) Refusal - Likelihood of Confusion.

The trademark examining attorney maintains and now makes FINAL the refusal in the summary of issues below. *See* 37 C.F.R. §2.63(b); TMEP §714.04.

**SUMMARY OF ISSUES MADE FINAL** that applicant must address:

- Section 2(d) Refusal - Likelihood of Confusion

### SECTION 2(d) REFUSAL – LIKELIHOOD OF CONFUSION

For the reasons set forth below, the refusal under Trademark Act Section 2(d) is now made FINAL with respect to U.S. Registration No. 4106625. *See* 15 U.S.C. §1052(d); 37 C.F.R. §2.63(b).

Registration of the applied-for mark is refused because of a likelihood of confusion with the mark in U.S. Registration No. 4106625. Trademark Act Section 2(d), 15 U.S.C. §1052(d); *see* TMEP §§1207.01 *et seq.* See the attached registration.

Applicant's mark is **M MONSTER** (featuring design elements) for “Air compressors; Vacuum cleaners” in International Class 7.

Registrant's mark is **MONSTER** (in standard characters) for “Air compressors” in International Class 7.

Trademark Act Section 2(d) bars registration of an applied-for mark that is so similar to a registered

mark that it is likely consumers would be confused, mistaken, or deceived as to the commercial source of the goods and/or services of the parties. *See* 15 U.S.C. §1052(d). Likelihood of confusion is determined on a case-by-case basis by applying the factors set forth in *In re E. I. du Pont de Nemours & Co.*, 476 F.2d 1357, 1361, 177 USPQ 563, 567 (C.C.P.A. 1973) (called the “*du Pont* factors”). *In re i.am.symbolic, llc*, 866 F.3d 1315, 1322, 123 USPQ2d 1744, 1747 (Fed. Cir. 2017). Any evidence of record related to those factors need be considered; however, “not all of the *DuPont* factors are relevant or of similar weight in every case.” *In re Guild Mortg. Co.*, 912 F.3d 1376, 1379, 129 USPQ2d 1160, 1162 (Fed. Cir. 2019) (quoting *In re Dixie Rests., Inc.*, 105 F.3d 1405, 1406, 41 USPQ2d 1531, 1533 (Fed. Cir. 1997)).

Although not all *du Pont* factors may be relevant, there are generally two key considerations in any likelihood of confusion analysis: (1) the similarities between the compared marks and (2) the relatedness of the compared goods and/or services. *See In re i.am.symbolic, llc*, 866 F.3d at 1322, 123 USPQ2d at 1747 (quoting *Herbko Int’l, Inc. v. Kappa Books, Inc.*, 308 F.3d 1156, 1164-65, 64 USPQ2d 1375, 1380 (Fed. Cir. 2002)); *Federated Foods, Inc. v. Fort Howard Paper Co.*, 544 F.2d 1098, 1103, 192 USPQ 24, 29 (C.C.P.A. 1976) (“The fundamental inquiry mandated by [Section] 2(d) goes to the cumulative effect of differences in the essential characteristics of the goods [or services] and differences in the marks.”); TMEP §1207.01.

### Similarity of the Marks

Applicant’s mark is **M MONSTER** (featuring design elements).

Registrant’s mark is **MONSTER** (in standard characters).

Marks are compared in their entireties for similarities in appearance, sound, connotation, and commercial impression. *Stone Lion Capital Partners, LP v. Lion Capital LLP*, 746 F.3d 1317, 1321, 110 USPQ2d 1157, 1160 (Fed. Cir. 2014) (quoting *Palm Bay Imps., Inc. v. Veuve Clicquot Ponsardin Maison Fondee En 1772*, 396 F.3d 1369, 1371, 73 USPQ2d 1689, 1691 (Fed. Cir. 2005)); TMEP §1207.01(b)-(b)(v). “Similarity in any one of these elements may be sufficient to find the marks confusingly similar.” *In re Inn at St. John’s, LLC*, 126 USPQ2d 1742, 1746 (TTAB 2018) (citing *In re Davia*, 110 USPQ2d 1810, 1812 (TTAB 2014)), *aff’d per curiam*, 777 F. App’x 516, 2019 BL 343921 (Fed. Cir. 2019); TMEP §1207.01(b).

When comparing marks, “[t]he proper test is not a side-by-side comparison of the marks, but instead whether the marks are sufficiently similar in terms of their commercial impression such that [consumers] who encounter the marks would be likely to assume a connection between the parties.” *Cai v. Diamond Hong, Inc.*, 901 F.3d 1367, 1373, 127 USPQ2d 1797, 1801 (Fed. Cir. 2018) (quoting *Coach Servs., Inc. v. Triumph Learning LLC*, 668 F.3d 1356, 1368, 101 USPQ2d 1713, 1721 (Fed. Cir. 2012)); TMEP §1207.01(b). The proper focus is on the recollection of the average purchaser, who retains a general rather than specific impression of trademarks. *In re Ox Paperboard, LLC*, 2020 USPQ2d 10878, at \*4 (TTAB 2020) (citing *In re Bay State Brewing Co.*, 117 USPQ2d 1958, 1960 (TTAB 2016)); *In re Inn at St. John’s, LLC*, 126 USPQ2d 1742, 1746 (TTAB 2018); TMEP §1207.01(b); *see In re St. Helena Hosp.*, 774 F.3d 747, 750-51, 113 USPQ2d 1082, 1085 (Fed. Cir. 2014).

In the present case, applicant’s mark and registrant’s mark create similar commercial impressions because each of the marks feature the nearly identical term “MONSTER”. Marks may be confusingly similar in appearance where similar terms or phrases or similar parts of terms or phrases appear in the

compared marks and create a similar overall commercial impression. *See Crocker Nat'l Bank v. Canadian Imperial Bank of Commerce*, 228 USPQ 689, 690-91 (TTAB 1986), *aff'd sub nom. Canadian Imperial Bank of Commerce v. Wells Fargo Bank, Nat'l Ass'n*, 811 F.2d 1490, 1495, 1 USPQ2d 1813, 1817 (Fed. Cir. 1987) (holding COMMCASH and COMMUNICASH confusingly similar); *In re Corning Glass Works*, 229 USPQ 65, 66 (TTAB 1985) (holding CONFIRM and CONFIRMCELLS confusingly similar); *In re Pellerin Milnor Corp.*, 221 USPQ 558, 560 (TTAB 1983) (holding MILTRON and MILLTRONICS confusingly similar); TMEP §1207.01(b)(ii)-(iii). As such, consumers retaining only a general rather than a specific impression of trademarks are likely to believe that the applicant's and registrant's marks identify the same source as applied to the respective goods.

Moreover, the term "MONSTER" is arbitrary as applied to the respective goods and is, therefore, considered a stronger mark than a descriptive or highly suggestive term. Thus, the use of the wording "MONSTER" in both marks creates a near identical commercial impression, and consumers viewing the marks are likely to believe that the applicant's and registrant's marks identify the same source.

Further, adding a term to a registered mark generally does not obviate the similarity between the compared marks, as in the present case, nor does it overcome a likelihood of confusion under Section 2(d). *See Coca-Cola Bottling Co. v. Jos. E. Seagram & Sons, Inc.*, 526 F.2d 556, 557, 188 USPQ 105, 106 (C.C.P.A. 1975) (holding BENGAL and BENGAL LANCER and design confusingly similar); *In re Toshiba Med. Sys. Corp.*, 91 USPQ2d 1266, 1269 (TTAB 2009) (holding TITAN and VANTAGE TITAN confusingly similar); *In re El Torito Rests., Inc.*, 9 USPQ2d 2002, 2004 (TTAB 1988) (holding MACHO and MACHO COMBOS confusingly similar); TMEP §1207.01(b)(iii). In the present case, the marks are identical in part as to "MONSTER", and the additional "M" in applicant's mark does not obviate similarity. Thus, consumers encountering the marks may believe that applicant's mark merely identifies a line of goods from the same source as registrant's mark.

In addition, applicant's design elements do not obviate similarity because registrant's mark is in standard characters. A mark in typed or standard characters may be displayed in any lettering style; the rights reside in the wording or other literal element and not in any particular display or rendition. *See In re Viterro Inc.*, 671 F.3d 1358, 1363, 101 USPQ2d 1905, 1909 (Fed. Cir. 2012); *In re Mighty Leaf Tea*, 601 F.3d 1342, 1348, 94 USPQ2d 1257, 1260 (Fed. Cir. 2010); 37 C.F.R. §2.52(a); TMEP §1207.01(c)(iii). Thus, a mark presented in stylized characters and/or with a design element generally will not avoid likelihood of confusion with a mark in typed or standard characters because the word portion could be presented in the same manner of display. *See, e.g., In re Viterro Inc.*, 671 F.3d at 1363, 101 USPQ2d at 1909; *Squirtco v. Tomy Corp.*, 697 F.2d 1038, 1041, 216 USPQ 937, 939 (Fed. Cir. 1983) (stating that "the argument concerning a difference in type style is not viable where one party asserts rights in no particular display").

Accordingly, applicant's and registrant's marks are confusingly similar.

### **Relatedness of the Goods**

Applicant's goods are for "Air compressors; Vacuum cleaners" in International Class 7.

Registrant's goods are for "Air compressors" in International Class 7.

The compared goods need not be identical or even competitive to find a likelihood of confusion. *See On-line Careline Inc. v. Am. Online Inc.*, 229 F.3d 1080, 1086, 56 USPQ2d 1471, 1475 (Fed. Cir.

2000); *Recot, Inc. v. Becton*, 214 F.3d 1322, 1329, 54 USPQ2d 1894, 1898 (Fed. Cir. 2000); TMEP §1207.01(a)(i). They need only be “related in some manner and/or if the circumstances surrounding their marketing are such that they could give rise to the mistaken belief that [the goods and/or services] emanate from the same source.” *Coach Servs., Inc. v. Triumph Learning LLC*, 668 F.3d 1356, 1369, 101 USPQ2d 1713, 1722 (Fed. Cir. 2012) (quoting *7-Eleven Inc. v. Wechsler*, 83 USPQ2d 1715, 1724 (TTAB 2007)); TMEP §1207.01(a)(i); *see Made in Nature, LLC v. Pharmavite LLC*, 2022 USPQ2d 557, at \*44 (TTAB 2022) (quoting *In re Jump Designs LLC*, 80 USPQ2d 1370, 1374 (TTAB 2006)).

In the present case, applicant's and registrant's goods are identical as to "air compressors". Further, the attached Internet evidence establishes that the same entity commonly provides the relevant goods and markets the goods under the same mark. *See* attached Internet evidence from Milwaukee, Craftsman, DeWalt, Ryobi, Mi-T-M, and Nilfisk showing the same parties offering air compressors and vacuum cleaners. Thus, applicant's and registrant's goods are considered related for likelihood of confusion purposes. *See, e.g., In re Davey Prods. Pty Ltd.*, 92 USPQ2d 1198, 1202-04 (TTAB 2009); *In re Toshiba Med. Sys. Corp.*, 91 USPQ2d 1266, 1268-69, 1271-72 (TTAB 2009).

### **Section 2(d) Refusal – Conclusion**

The marks are similar in overall commercial impression, and the goods are highly related. It is likely that a consumer would mistakenly believe applicant's goods are offered by registrant(s) or vice versa. For these reasons, registration is refused pursuant to Section 2(d) of the Trademark Act.

Although applicant's mark has been refused registration, applicant may respond to the refusal(s) by submitting evidence and arguments in support of registration.

**ASSISTANCE:** Please call or email the assigned trademark examining attorney with questions about this Office action. Although an examining attorney cannot provide legal advice, the examining attorney can provide additional explanation about the refusal(s) and/or requirement(s) in this Office action. *See* TMEP §§705.02, 709.06.

The USPTO does not accept emails as responses to Office actions; however, emails can be used for informal communications and are included in the application record. *See* 37 C.F.R. §§2.62(c), 2.191; TMEP §§304.01-.02, 709.04-.05.

**How to respond.** File a [request form for reconsideration of this final Office action](#) that fully resolves all outstanding requirements and/or refusals and/or file a timely [appeal form to the Trademark Trial and Appeal Board](#) with the required fee(s). Alternatively, applicant may file a [request form for an extension of time to file a response](#) for a fee.

**Did you hear that?**  
26 days ago  
Unbelievably quiet! I am so pleased with how quiet this compressor is. The air output is top notch. Very impressive for such a quiet compressor perfect for air nailing or inflating any tires. Battery consumption using an M18 5.0ah is a little on the quick side, from 0psi to 40psi. And two bars left on the 5.0 ah battery. Still great compressor very happy with its performance.  
● Yes, I recommend this product.

Great for small jobs

a month ago

Quiet and portable. It's nice to leave the cords and long hoses in the shed. I have used it for hailing trim and inflating tires so I wouldn't have to drag out big compressor. I haven't had that opportunity yet though.

● Yes, I recommend this product.

Little Toasty

a month ago

I had a fire at my shop Jan 2023. I thought the Compressor was a total loss everything around it melted. I pulled out the battery and replaced it. New one in order to run a nail gun to put the plywood up at my burnt office. Sure enough a fire right up I highly recommend milwaukee and the air compressor

Embarrassing for Milwaukee

13 days ago

Tried this vacuum several times with different debris on the floor. Won't suck up anything more than fine sawdust, and it doesn't even do that well. It seems to pick up tiny stuff ok if you use the small nozzle but any vacuum would do that. Had to return it, definitely not for job sites. I had my gf come clean up with her cheaper vacuum setup and that stuff did way better. I don't know how this was released to the public.

No, I do not recommend this product.

Super convenient, not powerful enough.

21 days ago

I love it because it's convenient, and the features are very intuitive and efficient to use - typical of M18 Fuel series. However I'm pretty disappointed with the suction power on a 5Ah battery pack. Also not a huge fan of the floor tool. I wish it was better for wood floors - like all brush contact instead of the low clearance, wheels, and the flap.

Yes, I recommend this product.

### I would not buy this product until it gets improve

a month ago

This vacuum is a good quality product. Well made. Milwaukee quality. It does suck up medium to small pieces of debris. It doesn't do the best job on bigger pieces. The vacuum doesn't have the greatest vacuum. It needs more power. It also drains the battery pretty fast.

🗳️ No, I do not recommend this product.

Cleaning lady

★☆☆☆☆

### Not worth it

a month ago

This product unfortunately does not stand up to other Milwaukee tools. Next to no suction. The head attachment tools do not provide a good clean. Lots of dust and sawdust left behind. Always has to be used on high or it does not suck anything up. On high the battery only last 12ish minutes. The vacuum needs more power and better battery life. The hose and handle is placed on the right hand side of the vacuum canister therefor making it extremely difficult for a left handed person. There needs to be better attachments such as a brush head. The back pack option is nice and it is quiet but would not recommend for the cost. If you are looking at picking up any dust, fine particle or saw dust, this vacuum won't work for you.

🗳️ No, I do not recommend this product.

### Yikes!

a month ago

I absolutely love this vacuum, even though it was ridiculously expensive, especially the batteries because it is running the electric motor they whole time instead of intermittently like typical battery powered tools, the battery dies in about 15 minutes (I have the high output XC 8.0 battery) at Home Depot this battery cost \$229! Yikes! Great suction well-built. I spent \$550 on a piece of crap Dyson vacuum this is a significantly better design more rugged plastic I can fit all the staircases in my house in one charge. My house is from the 1880s and has a severe lacking of outlets. I have vacuumed the cobwebs in the corners of my basement for the first time in 20 years. Take home message... I'm glad I bought it. Bill in Orono

🗳️ Yes, I recommend this product.

Misleading

Well assembled unit and is relatively quiet. If you looking for a true 150 to 175 psi air compressor, look elsewhere. No where in the specs does it state your regulated pressure is capped @ 90%. You have to read the instruction manual and find on page 4 that the max pressure is 150 psi. My brand new unit maxed out @ 145. Will be returning and start the shopping search again.

Has Air Leak & Regulator Not Working Correctly

The compressor looks great and fired right up when I got it home, but noticed a air leak by the safety check valve. Plus, I noticed the air pressure on the outlet would only go up to 135 psi no matter how high I turned the regulator up. I will need a new safety valve and the

regulator to be fixed or replaced. Calling Craftsman to hopefully get these two issues resolved quickly. The compressor seems to be very good quality, but need to get these two issues resolved before giving a complete review and to see how it performs after the repairs are done.

Good Compressor

I've had it 6 months now and use it regularly. It is quieter comparing it to my 4 gallon craftsman I used for 20 years. The only thing to to me is this one takes forever it seems to fill up around 15-20 minutes. So far it's been a great air compressor and have no problems with.

175 Oil Free Air Compressor

I've has mine for over a year, I took the first one back and exchanged it, it didn't matter what

QUALITY OF SERVICE

VOTES 2

I was using it would not keep pressure, and so not ever try to paint with it, it will give you the worst paint job ever, your standing around waiting on pressure more than you are painting, and you can tell that the paint is uneven from waiting, you can't get one body part painted, because it doesn't hold the pressure you need, I tried to return it to lows again but it had been over there time limit, to exchange, so I scraped it. I've got a little 10 gallon that came from harbor freight 7 to 10 years ago that I'm back to using it's not much better but it's old and half the size, and the motor on this one doesn't give out even after all these years

Bad Placement Of Drain Valve

very good compressor,no leaks when full off shuts off like it should.the only complaint i have is the drain valve, it's way to close to the ground, no room to get my fingers in to open or close the valve.Had To Put the compressor on 1x6" peaces of wood.other then that.Nice Well Built Compressor.

Phenomenal Compressor!!!

It's DeWalt versus the other's in today's showdown. DeWalt USA has been around since the early 1900's and I'm going to relate with you everything that I learned about this phenomenal 80 gallon, 7.5 H.P., 175 psi 2-Stage oil lubed Industrial Compressor, so you guys and girls out there can make the right purchasing decision for yourself or your company.

Everything from the 80 gallon tank, to the air pump, to the Baldor induction motor with the Eaton Magnetic Starter beat the others who come to town. doesn't give me any issues. Everyone knows that having the right tool for the job makes the job much easier, but being able to rely on the tools again and again is always a plus, especially when it come to higher priced equipment.

Alright, let's take a look at the DeWalt Model DXCMV7518075 Compressor. First, it has an 80 gallon ASME tank and 175 psi to take care of all your air power requirements. It has the 2-Stage pump to insure you get air fast. It has an oil lubricated pump to insure long lasting air production. It has a magnetic starter that eases the electrical shock to the system and extends motor longevity. The pump itself is a one piece cast iron cylinder body and has a cast iron 12" balanced flywheel.

This compressor is much quieter than my previous models. I like the quality of the compressor build. It is built the way we expect it in the USA!

You can't go wrong with this compressor. It is single phase, 230 volts. It comes pre-wired and all you have to do is run your wire to the magnetic starter and BAM! You're in business. I absolutely love the way this compressor performs.

Yes the compressor is heavy at 623 lbs, but would you rather relinquish quality for weight? Just make sure you make the same comparisons to the other compressors and I am sure you'll find the same result as I did. No cheap capacitors and junk pumps that don't last. If I were to review the differences in built quality of the cheaper competitor models against this model compressor, you would get the picture fast.

Well, as you can tell, I feel this compressor is amazing and by far, hands down my favorite compressor of the many I've owned in my previous shops.

Now, I would love to hear your experiences with DeWalt...

12 Gallon 5.5 PHP STEALTHSONIC QUIET VACUUM

★★★★★ (0) [WRITE A REVIEW](#)

Buy Now

[Add to Wishlist](#)

- Powerful 5.5 Peak HP motor provides maximum power of suction and high air flow to clean up the toughest messes.
- Stealthsonic quiet technology delivers less than 65 dba of noise to allow for conversations and no need for hearing protection.
- Large 12 G Durable no break virgin resin Poly Tub with built in tank drain gives you plenty of cleaning power and space. Tank has large and durable handles to deal with the toughest of messes.

[View more features](#)

## Product Overview

The 12 Gallon, 5.5 HP Wet/Dry Vacuum has a convenient handle and large rear wheels for easy maneuverability around the jobsite, even when the tank is full. It features a fine-dust cartridge filter for small, dry debris and wet materials. With a large, water-resistant on/off switch, built-in 20 ft. power cord, and accessory bag to keep tools and attachments organized, this tough vacuum is built for the jobsite. Move it in any direction with the swiveling casters, and empty liquids easily with the built-in tank drain. [Read more](#)

## Additional Features

- Rubberized durable non marring swivel casters provide steady and easy movement across tough surfaces.
- Extra-long 20 Ft power cord with cord wrap design.
- Strong carrying handle that also functions as a convenient cord wrap.
- Integrated hose management design allows for easy storage and portability.
- Large water-resistant switch for easy on/off operation.
- Easy Filter Change and Cleaning with Clean Connect™ locking system.
- Optional Accessories available Fine Particle Dust Bags (DXVC4112 ) and High Efficiency Cartridge Filters (DXVC6912) or HEPA Filter (DXVC6914)
- Includes a bonus contractor kit

## Includes

- |  |   |
|--|---|
| (1) Crush resistant 2.5 inch x 7 ft hose (DXVA19-2501) | (1) Crevice nozzle (DXVA08-2506)        |
| (2) Extension wands (DXVA08-2502)                      | (1) Round brush (DXVA08-2401)           |
| (1) Washable standard cartridge filter (DXVC6910)      | (3) Disposable filter bag (DXVA19-4102) |
| (1) Floor brush (DXVA08-2591)                          | (1) Accessory storage bag (DXVA19-5156) |

Excellent work tool

HectorIara

3 days ago

Excellent work tool takes up little space. Excellent to move and very easy to use, performs very well despite being wireless

Did you submit this review as part of a sweepstakes entry? Yes

★★★☆☆

Tank too small

IamArtimus

3 days ago

I love the look of this, the portability, and I love the Ryobi line of tools. This compressor is very well made, but the tank does not hold enough air. I can't even fill a bicycle tire! I do love it for cleaning the cracks inside my car and for very small jobs.

Did you submit this review as part of a sweepstakes entry? No

 No, I do not recommend this product.

**Compact,portable,and capable**

**Dakodey**

29 days ago

Just bought this today to replace the function of my 7+ year old and we'll used 18v ryobi inflator/Dellator that broke. This new system is great. Don't forget to follow the break in instructions and make sure to use a 4AH or larger battery. You won't be disappointed.

## Wet/Dry Vacuums

Truly the best in their class, the Mi-T-M wet/dry vacuums are designed for commercial and industrial applications. With three sizes to choose from, 9 gallon, 13 gallon and 18 gallon, these vacuums are constructed of high-impact polyurethane and are virtually indestructible.

Equipped with a hydro flow filter for both wet and dry pick up, there is no need to change out the filter when going from one application to another. Rated as some of the quietest in the industry, these vacuums offer superior cleaning power.

Home / Residential Products / Air Compressors

## Air Compressors

Perfect for jobs around the house, small workshop or even a jobsite, the Mi-T-M residential and commercial air compressors deliver great air power. Available with both single and two-stage compressors they are built to perform and built to last. Available in both electric and gas powered.

### Residential Air Compressors

Completely portable, Mi-T-M residential air compressors are the perfect size for small jobs around the home that require air power. Used to inflate tires, sporting gear, air mattresses and pool accessories, they are also powerful enough to handle the most common DIY projects.

## United States Patent and Trademark Office (USPTO)

### USPTO OFFICIAL NOTICE

Office Action (Official Letter) has issued  
on April 11, 2023 for  
**U.S. Trademark Application Serial No. 90894753**

A USPTO examining attorney has reviewed your trademark application and issued an Office action. You must respond to this Office action to avoid your application abandoning. Follow the steps below.

- (1) **[Read the Office action](#)**. This email is NOT the Office action.
- (2) **Respond to the Office action by the deadline** using the Trademark Electronic Application System (TEAS) or the Electronic System for Trademark Trials and Appeals (ESTTA), as appropriate. Your response and/or appeal must be received by the USPTO on or before 11:59 p.m. **Eastern Time** of the last day of the response deadline. Otherwise, your application will be **[abandoned](#)**. See the Office action itself regarding how to respond.
- (3) **Direct general questions** about using USPTO electronic forms, the USPTO **[website](#)**, the application process, the status of your application, and whether there are outstanding deadlines to the **[Trademark Assistance Center \(TAC\)](#)**.

After reading the Office action, address any question(s) regarding the specific content to the USPTO examining attorney identified in the Office action.

### GENERAL GUIDANCE

- **[Check the status](#) of your application periodically** in the **[Trademark Status & Document Retrieval \(TSDR\)](#)** database to avoid missing critical deadlines.
- **[Update your correspondence email address](#)** to ensure you receive important USPTO notices about your application.
- **[Beware of trademark-related scams](#)**. Protect yourself from people and companies that may try to take financial advantage of you. Private companies may call you and pretend to be the USPTO or may send you communications that resemble official USPTO documents to trick you. We will never request your credit card number or social security number over the phone. Verify the correspondence originated from us by using your serial number in our database, **[TSDR](#)**, to confirm that it appears under the “Documents” tab, or contact the **[Trademark Assistance Center](#)**.

- **Hiring a U.S.-licensed attorney.** If you do not have an attorney and are not required to have one under the trademark rules, we encourage you to hire a U.S.-licensed attorney specializing in trademark law to help guide you through the registration process. The USPTO examining attorney is not your attorney and cannot give you legal advice, but rather works for and represents the USPTO in trademark matters.
